

our mini guide for...

Bio Urinal Blocks

DELPHIS*

*eco PROFESSIONAL CLEANING

Application and Directions

Replace block when it has dissolved for maximum efficiency. Keep container closed when not in use. NB: Do not use this product with anti-bacterial products and cleaners.

Urinals: 1x block per urinal

Troughs: 1x block every 50cm

water saving benefits:

Reducing the frequency of flushing to once every 5-6 hours can lower water usage by up to 89% per urinal. The average urinal uses 2.2 litres of water per flush. Cost per flush = £0.013p

1x untreated urinal:

Average daily flushes:	36
Cost per day (£0.013p per flush):	£0.468
Flush cost per annum:	£170.82
Average daily water consumption (ltr):	79.2
Annual water consumption (ltr):	28,908

1x urinal treated with Delphis Eco Bio Urinal Blocks:

Average daily flushes:	4
Cost per day (£0.013p per flush):	0.052
Flush cost per annum:	£18.98
Average daily water consumption (ltr):	8.8
Annual water consumption (ltr):	3,212

Annual savings per urinal (based on example above):

Savings per annum:	£151.84
Product cost per annum:	£20.00
Savings less cost:	£131.84
Water consumption savings:	89%

Proper dosage saves cost and minimises environmental impact:

Delphis Eco encourage proper dosage and users to reduce waste going to land fill by recycling empty containers.

Main Use

COSHH

Health and Safety

Use only as directed. Do not mix different cleaners. Seek medical attention if in discomfort or if any symptoms persist.

Eye Contact: Avoid contact with eyes, if product gets into eyes, rinse with water.

Skin Contact: Avoid contact with skin, if product gets onto skin wash with water and remove any contaminated clothing.

Ingestion: Do not drink, if swallowed drinking water may be beneficial, do not induce vomiting.

Inhalation: Avoid inhaling product, move to fresh air if in discomfort.

don't forget PPE..

Always wear the correct protective clothing if required. For best results we recommend using the correct dosing and colour coded microfibre cloths - please ask your manager for details.

how to dispose...

Dirty, used washing solution should be disposed of via drains that lead only to foul sewers. Do not allow detergent solutions to contaminate surface water drains. In the event that concentrated product should need to be disposed of, run small amounts to foul waste, diluting with plenty of water. For larger quantities, seek advice on disposal from the local authorities. Delphis Eco products are packed in fully recyclable containers. Empty containers should be rinsed thoroughly, the washings being run to foul waste. The containers may then be sent for recycling. Dispose of all waste in a responsible manner. Be aware of the environment.
